

Selected Topics in Internal Medicine 2020 - Online CME

Activity Description

This online CME course contains content from the Selected Topics in Internal Medicine 2020 course. Selected Topics in Internal Medicine (STIM) is a postgraduate course designed to update general internists, internist-subspecialists, family medicine specialists, and other primary health care professionals on selected internal medicine topics. Experts from various disciplines in internal medicine give presentations on common problems encountered in clinical practice, with a focus on clinical pearls and practice updates. This is repurposed from the livestream event in 2020.

Target Audience

This activity is appropriate for practicing general internists, family practice physicians, specialists, and advanced practitioners in need of practice updates.

Learning Objectives

Upon conclusion of this activity, participants should be able to:

- Summarize recent updates, clinical studies, and new guidelines that impact practice in general medicine.
- Review updates and clinical practice strategies in the areas of general internal medicine, gastroenterology, infectious diseases, endocrinology, rheumatology, cardiology, pulmonology, hematology, geriatrics, perioperative medicine, psychiatry and neurology.
- Describe management options for heart failure and chronic coronary artery disease.
- Define treatment strategies for tremors.
- Summarize assessment and treatment strategies for atrial fibrillation.
